Offshore Wind Is Ready to Power New York

Governor Andrew M. Cuomo has set an unprecedented commitment to develop up to 2.4 GW of offshore wind by 2030, enough to power 1.25 million homes. New York State is working to responsibly develop this clean, renewable energy source.

NYSERDA is encouraging those with a vested interest in offshore wind to get involved—attend upcoming public information meetings, comment on the development of the Offshore Wind Master Plan by August, 31, 2017, and follow the progress.
